

**Some quick notes:** Each template varies with respect to the hook you are using, but the third down on page one is what is used in the shad video with a 3/0 hook (Gamakatsu 294, 3/0). Remember that [hook size is just a number](#). Use what works for you with whatever hook. Match the template to the shank length. Get more templates for bluegill [here](#) and for crabs [here](#).
